

SCIENCES, TECHNOSCIENCES AND FAITH IN THE ERA OF INTEGRAL ECOLOGY

International conference.
9 - 11 october 2024

Université Catholique de Lille
60 boulevard Vauban, Lille
France

ETHICS
EA7446

Objectives

Taking into account studies on science and theology since the 1980's, the conference aim is to analyze in which ways the ecological urgency, which puts into question scientific progress, has an impact on science and theology questions today, in particular through the development of technosciences and related engineering since the beginning of the 21st century.

Main topics in the field of sciences, technosciences and faith

Theology of Creation

Social Christian teaching

The digital age and revolution

The question of scientific/social progress today

Christian anthropology

Peace & fraternity, in context of ecumenism and
interreligious dialogue

Languages of the conference: French and English, with simultaneous translation

Room RS 351
